Patent Cooperation Treaty Information

For information concerning the PCT member countries see the notice appearing in the Official Gazette at 1017 O.G. 10 on Apr. 13, 1982. For use of the European Patent Office as a Searching Authority for PCT applications filed in the United States, see the notice in the Official Gazette of Sept. 28, 1982 at 1022 O.G. 52.

Note that the domestic PCT fees have been increased as of Oct. 1, 1982 by a rule change to 37 CFR 1.445 that was published at 1021 O.G. 11 on Aug. 10, 1982. Also note that the international PCT fees have changed as of Jan. 1, 1983 and the Search Fee for the European Patent Office as Searching Authority changed as of Jan. 22, 1983. The notice regarding the change in international fees and the Search Fee for the European Patent Office appeared at 1025 O.G. 27, on 28 Dec. 1982. The current schedule of fees is as follows:

Transmittal fee	$ 125.00
Search fee	
U.S. Patent and Trademark Office as Searching Authority	
· No corresponding prior U.S. national application filed	500.00
· Corresponding prior U.S. national application filed	250.00
European Patent Office as Searching Authority	
· All cases	670.00
International Fees	
Basic Fees (first 30 pages)	265.00
Basic Supplemental Fee (for each page over 30)	5.00
Designation fee (for each national or regional office)	65.00

Patents Granted - Fiscal Year 1983

The number of utility patents granted weekly for the issues of Feb. 22 through May 3, 1983, will average approximately 715 per week. The number will increase to about 1,000 in mid-May and to 1,330 by mid-September. These fluctuations are related to the adaptation of new examiners to their workload. For fiscal year 1983, ending with the issue of Sept. 27, 1983, the Office plans to grant approximately 56,400 utility patents.

Automated Patent System Proposal

The following is a verbatim copy of a Commerce Business Daily notice describing the Patent and Trademark Office's consideration of a proposed solution for the automated patent system described in the Section 9 report delivered to Congress of Dec. 13, 1982.

"The U.S. Patent and Trademark Office (PTO), Department of Commerce (DOC), contemplates the award of a contract to the Chemical Abstract Ser-

vices (CAS) to provide system architecture, and design services and, as necessary, to procure an automated patent system as described in the Automation Master Plan released to the Congress and the public on Dec. 13, 1982. PTO believes the automated system is software driven. Chemical patent applications and patents constitute a large part of the PTO data base. CAS has developed a unique system to create, store, maintain, and retrieve a large chemical structure and text data base from interactive workstations that support chemical structure graphic and office automation functions over a local area network involving multiple functionally specialized computers. With modifications and enhancements that are now being developed, the CAS system architecture an software are believed capable of satisfying the majority of PTO's requirements. CAS has proposed a solution which involves providing its current software base and modifying and extending it to meet all PTO requirements.

As system developer, CAS will provide the hardware and commercial software needed for the PTO on a fully competitive basis under the provisions of the Federal Procurement Regulations. These items represent the bulk of the automated system expenditures. The comtemplated contract with CAS would provide for the following:

- Access to and use of CAS ONLINE services,
- A license to use CAS software,
- Enhancements to CAS software to meet PTO requirements,
- Maintenance of CAS provided software,
- Documentation, training, and other services to install, operate, and effectively use CAS provided system features, and
- The competitive acquisition and lease of computer and communications equipment, software, and related services needed for the PTO automated system.

The contract is not intended to limit contracts for other commercial data bases that may be needed for patent examination for competitive acquisition of equipment and other components that will be needed.

PTO and DOC will consider alternative solutions for the automated patent system. Alternative technical solutions should be submitted to describe in summary the specific features, phases and time schedules for accomplishing the automation effort. The submission should include a summary of the firm's qualifications to do the work and an estimate of costs. It should be sent to the Contracting Officer of IR Procurement, DOC, 14th and Constitution Avenue, N.W., Washington, D.C., 20230, within 30 days of this announcement. Request for copies of the Automation Master Plan may also be obtained from the Contracting Officer.

Should the PTO determine that any proposals have merit, it will schedule follow-up briefings, demonstrations, and discussions prior to further action."

The following marks are published in compliance with section 12(a) of the Trademark Act of 1946. Applications for the registration of marks in more than one class have been filed as provided in section 30 of said act as amended by Public Law 772, 87th Congress, approved Oct. 9, 1962, 76 Stat. 769. Opposition under section 13 may be filed within thirty days of the date of this publication. See Rules 2.101 to 2.105.

A separate fee of two hundred dollars for opposing each mark in each class must accompany the opposition.

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
